(2) Steps taken or proposed to be taken for improvement:-

- a) The Company continued to focus on cane development activities, comprising of varietal replacement with proven high sugared varieties, change in pattern of sowing, ratoon management, encouraging use of Bio – fertilizers, Bio-pesticides, soil testing activities etc. and modern agricultural practices due to which the recovery and crushing has been increased gradually and is expected to further improve in the coming seasons. Apart from these activities, company is further strengthening the cane development activities by way of development of in-house agri research centre, integrated pest management programme, soil testing facilities, encouraging use of Bio-fertilizers and Bio-pesticides and training facilities for the farmers & cane development staff.
- b) To improve the financial viability of sugar manufacturing units, Company is providing the baggasse based Co-generation Capacity of 103 MW (55.5 MW Exportable) by installation of Power Co-Generation facility at all four Sugar Factories. The power produced by our cogeneration plants utilized for running sugar mills and the surplus power have been exported.
- c) Further, the Company has increased the capacity of its Distillery plant from 75 KLPD to 150 KLPD at Barkatpur Unit. The Company has also successfully installed and implemented the incineration boiler at Barkatpur unit to enhance the Distillery capacity of the Company from 450 Lakh BL p.a. to 540 Lakh BL p.a.
- d) Besides this, Company has also established Distillery at Libberheri Unit of the Company with the capacity of 50 KLPD.

(3) Expected increase in productivity and profits in measurable terms:-

There is adequate production capacity and steps are being taken to improve the cost efficiency.

We wish to further inform you that the impact of the above measures is also reflecting in the Audited accounts of the Company for the financial year under review. These measures are expected to go a long way in improving the performance of the Company.

During the year export sales were 20% of total sales while during previous year it was 23% of total sales.

During the financial year, the Company commenced its crushing in all units i.e. Libberheri, Barkatpur, Khaikheri & Shermau in 2nd week of November 2020. The results were slightly on lower side as compared to previous season in terms of recovery mainly due to climatic changes specifically in the state of U.P. However, recovery was better as compared to other units/whole state reduction in recovery.

The Company's aggregate sugar cane crushing were 366.10 Lakhs qtls during the season 2020-21 as against 383.02 Lakhs qtls in 2019-20. The Company had a recovery of 11.44% (Equivalent to C Heavy 12.03%) as against 11.75% (Equivalent to C Heavy 12.18%) in previous season.

The recovery was on lower side mainly due to climatic changes. The Company continued to focus on cane development activities, comprising of varietal replacement with proven high sugared varieties, change in pattern of sowing, ratoon management, encouraging use of Bio – fertilizers, Bio-pesticides, soil testing activities etc. and modern agricultural practices due to which the recovery and crushing is expected to further improve in the coming season. Apart from these activities, company is further strengthening the cane development activities by way of development of in-house agri research centre, integrated pest management programme, soil testing facilities, encouraging use of Bio-fertilizers and Bio-pesticides and training facilities for the farmers & cane development staff.

The Uttar Pradesh and Uttarakhand Government have announced State Advised Price (SAP) for sugarcane at Rs.315/per qtl (Rs 325/- per qtl for early variety) and Rs. 317 per qtl (Rs 327/- per qtl for early variety) respectively for season 2020-21.

Co-generation Division

During the period under review, your company produced 3,011 Lakhs KWH of power as compared to 2,680.70 Lakhs KWH of power in the year 2019-20. Out of total production, your company exported 1,446.20 Lakhs KWH to UPPCL/UPCL for a total amount of Rs.5,367 Lakhs against 1,399.13 Lakhs KWH for an amount of Rs.4,955 Lakhs in the previous year. The main reason of increase in power revenue is due to higher cane crush as compared to previous financial year.

REC is an additional source of Revenue to your company. During the year 2020-21 Company traded 644 units of REC for Rs. 6.44 Lakhs. REC have not been traded since the Appellate Tribunal for Electricity's (APTEL) order postponing the trading of REC's.

Future Outlook

Sugar industry Association is requesting on continuous basis to the State/Central Government for fixing cane price on the basis of revenue sharing formula. Sugar prices were stable during the year because of monthly quota system introduced by the Government of India w.e.f. June 2018 onwards.

Central Government has taken certain steps to stabilize the price of sugar like:

- MAXIMUM ADMISSIBLE EXPORT QUANTITY (MAEQ)- In view of the inventory levels with the sugar industry and to facilitate achievement of financial liquidity, Maximum Admissible Export Quantity (MAEQ) have been fixed for sugar season 2020-21–(60 Lakhs M.T.) and for sugar season 2019-20 – (60 Lakhs M.T.) by Government of India.
- The Central Government with a view to facilitate export of sugar during the season 2020-21 thereby improving the liquidity position of sugar mills enabling them to clear the cane dues of farmers of sugar season 2020-21, hereby notifies the scheme for providing assistance to sugar mills for expense on marketing cost including handling, upgrading and other processing cost which details are as under:-

Tota	al - Rs. 4,000/- M.T.
b) Ocean Freight	- Rs. 1,600/- M.T.
a) Internal Transport & Freight charges including loading & unloading	- Rs 2,400/- M.T.
Above amended w.e.f. 20/05/2021 are as under	
Tot	al - Rs. 6,000/- M.T.
c) Ocean Freight	- Rs. 2,000/- M.T.
b) Internal Transport & Freight charges including loading & unloading	- Rs 2,400/- M.T.
a) For marketing including handling & processing cost	- Rs. 1,600/- M.T.

- Quantity restriction (On monthly basis) imposed on sale of sugar from June 2018 onwards and this is being continued.
- Minimum Selling Price (MSP) of sugar was first fixed at Rs. 29 per kg in June 2018 and later increased to Rs. 31 per kg in February 2019. MSP is the ex-factory price (excluding GST and transportation charges) below which no mill can sell sugar in India. Owing to India becoming a surplus sugar producer, the MSP environment is expected to continue.

However, there will be gap of demand and supply quantity of sugar in India due to over production of sugar.

Ethanol Sector

Achieving energy security and the transitioning to a thriving low carbon economy is critical for a growing nation like India. Blending locally produced ethanol with petrol will help India strengthen its energy security, enable local enterprises and farmers to participate in the energy economy and reduce vehicular emissions. The Government of India notified the National Policy on Biofuels – 2018 (NPB–2018) on 04.06.2018 wherein, under the Ethanol Blended Petrol (EBP) Program, an indicative target of 20% blending of ethanol in petrol by 2025 was laid out.

Ethanol is one of the principal biofuels, which is naturally produced by the fermentation of sugars by yeasts or via petrochemical processes such as ethylene hydration. It has medical applications as an antiseptic and disinfectant. It is used as a chemical solvent and in the synthesis of organic compounds, apart from being an alternative fuel source.

During the year, CCEA has approved the following for the sugar season 2020-21 (December 2020 to November 2021) during ethanol supply period from various feeds:-

- Price of Ethanol from C hy Molasses increased from Rs.43.75 to Rs. 45.69 Per Litre.
- Price of Ethanol from B hy Molasses increased from Rs.54.27 to Rs. 57.61 Per Litre.
- Price of Ethanol from Sugar cane Juice/Sugar/Sugar Syrup increased from Rs. 59.48 to Rs. 62.65.
- Damaged food grain at Rs. 51.55 from Rs. 50.36 Per Litre.
- Additionally, GST and transportation charges will also be payable.

For augmentation of ethanol production capacity by setting up of new distilleries attached with their sugar mills including capacity expansion of existing distillery and for increasing ethanol production capacity by way of installation of incineration boilers or by adoption of any other method approved by CPCB for zero liquid discharge. Government will provide interest subvention @ 6% per annum or 50% of rate of interest charged by bank whichever is lower on the loan sanctioned & disbursed by banks for 5 years, this scheme further extended.

Global Sugar production in sugar season 2020-21 is estimated at 169.01 Million MT with a decrease of 1.24% as compared to sugar production of 171.16 Million MT in sugar season 2019-20.

Industry Facts:

- Sugar is one of the world's major agro-based industry and is also one of the most actively traded soft commodity on the exchanges.
- > More than 80% of sugar produced is from sugarcane while balance is from sugar beet.
- Brazil & India are the largest sugar producers from Sugarcane & EU (European Union) and US are the major sugar producers from beet.
- Brazil's sugar production 2020-21 is forecast to drop 5 percent to 39.90 million tons due to a reduced volume of sugarcane for crushing.
- India produced 30.57 million tons of sugar between 1st October 2020 and 31st May 2021. This is 3.57 million tons higher than 27.00 million tons produced at the same time last year.
- > Brazil, India, EU, Thailand, China and U.S are the top global producers of Sugar.
- > India, EU, China, Brazil and U.S are the major sugar consuming countries.
- > India's share in World Sugar Production was approx 18 % in 2020-21.
- India is the 3rd largest exporter in sugar after Brazil and Thailand.
- ▶ Global exports are better at 64.28 Million MT against 66.55 Million MT in 2019-20.

(Source: ISO -Report Feb 2021)

- Agroconsult has forecasted a deficit of 1 million mt in 2021-22, up from 2 lac mt deficit in 2020-21.
- Projecting an increase in sugar production in Thailand and India in 2021-22 SS, Tropical Research Services (TRS) forecast a sugar surplus of 5.18 mln tonnes for 2021-22, with output rising 5% to 191.51 mln tonnes raw value while consumption increases by 1% to 186.33 mln tonnes.
- Higher diversion of sugar in ethanol is expected because of higher consumption of Petrol.

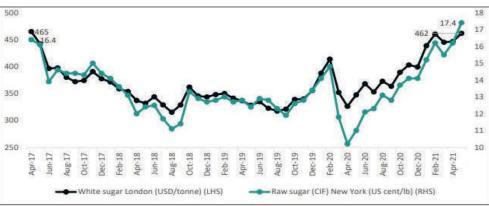

Domestic sugar prices continue to remain range-bound

The wholesale sugar prices in India continued to average in the range of Rs.33 per kg - Rs.34 per kg for more than the past 3 years [SS 2017-18 to SS 2020-21 (up to 20 May 2021)]. Sugar price that had averaged at Rs.39 per kg during SS 2016-17 declined by 14.3% to Rs.34 per kg in SS 2017- 18 primarily due to bumper sugar output of 32.5 million tonnes (growth of 60.1% y-o-y) and minimal sugar exports during the year. Following this, India had an opening stock of more than 10 million tonnes of sugar in each of the next 3 consecutive years, which is much more than the normative stock requirement of 4-6 million tonnes for a year. India started SS 2018-19, SS 2019-20 and SS 2020-21 with an opening stock of 10.7 million tonnes, 14.6 million tonnes and about 10.5 million tonnes respectively. Such high carryover stocks have been restricting any major increase in domestic sugar prices since SS 2017-18 (refer Chart given below):-

International sugar prices touch 4 year high in May 2021

In May 2021 (up to 19 May), international sugar prices touched 4 year high as the white sugar prices in London and the raw sugar prices in New York averaged at USD 461.8 per tonne and US cent 17.4 per lb, respectively. Such high price levels for both these varieties were witnessed earlier 4 years back in the initial months of 2017. The price of white sugar in London and that of raw sugar in New York had averaged at USD 465.1 per tonne and US cent 16.4 per lb in April 2017.

INDIAN PERSPECTIVE OF SUGAR & ETHANOL INDUSTRY

- Sugar mills across the country have produced 306.84 lacs tons of sugar between 1st October 2020 and 30th June 2021. This is 35.52 lacs tons higher than 271.32 lacs tons produced at the same time last year.
- U.P. sugar mills have produced 110.61 lacs tons of sugar as on 30th June 2021, which is 15.77 lacs tons lower than the production of 126.38 lacs tons produced by them last year on the corresponding date.
- In Maharashtra, crushing season has concluded and the mills of the State have produced 106.28 lacs tons of sugar, which is about 44.59 lacs tons higher as compared to 61.69 lacs tons produced in 2019-20 SS.
- In Karnataka, all the operating mills had closed their crushing operations and have produced 41.74 lacs tons of sugar as compared to 33.80 lacs tons produced last year same period.
- As compared to previous Sugar Season the production was lower in UP by around 12.48%.
- As compared to previous Sugar Season the production was higher in Maharashtra & Karnataka by around 72.28% & 23.28% respectively.

Prices:

• The following chart explains price trend during the period from April 2020 to March 2021:-

Source: Department of Consumer Affairs

Trade:

Due to higher production and higher stocks, the prices were depressed in the market. Due to reduction in price and higher stocks, cane dues were higher resulting which government has taken certain steps to keep the price stable.

- Export Quotas (MAEQ) of 60 Lakh tonnes of all grades of sugar were fixed along with assistance of Rs.6000/-MT for sugar season 2020-21 so the extra sugar can be exported.
- Further, Minimum price Rs.29/- kg of sugar have been fixed by the government and later on increased at Rs. 31/- kg fixed by the government during Feb.2019, quota of sales fixed from June 2018 onwards.
- Due to above steps, the sugar price remain stable from the month of June 2018 onwards.

Sugarcane Production and Pricing Policy:

The Government of India (GOI) supports research, development, training of farmers and transfer of new varieties and improved production technologies to growers in its endeavour to raise cane yields and sugar recovery rates. Following Cane Development activities which improve the productivity, yield & Sugar Recovery Percentage of Sugarcane, are undertaken:

- a. Varietal Replacement with proven high recovery varieties.
- b. Ratoon management.
- c. Development of Agri Research Centres.
- d. Integrated Pest Management Programme.
- e. Soil testing facilities.
- f. Encouraging use of Bio-fertiliser & Bio-pesticides.
- g. Training facilities to the Farmers.
- h. Introduction of Latest methods of farming and use of various mechanical equipments for cultivation.

The Indian Council of Agricultural Research (ICAR) conducts sugarcane research and development at the national level. State agricultural universities, regional research institutions, and state agricultural extension agencies support these efforts at the regional and state levels. The Central and State Governments also support sugarcane growers by ensuring finances and input supplies at affordable prices. To increase the area of cultivation and production in India, a centrally sponsored scheme called the Sustainable Development Fund of Sugarcane Based Cropping System Area under the Macro Management Mode of Agriculture is being implemented in various sugarcane growing states.

The GOI establishes a Fair and Remunerative Price system (FRP) for sugarcane on the basis of recommendations given by the Commission for Agricultural Costs and Prices (CACP) and after consulting State Governments and associations of the sugar industry and cane growers.

Following factors are considered for fixation of FRP:

- Cost of Production of Sugarcane.
- Recovery of Sugar from Sugar cane.
- Inter Crop Price parity.
- Price of Sugar Sold.
- Reasonable margins to Farmers.
- Realisation of By Product.
- Return to the growers from alternative crops and the general trend of prices of agricultural commodities;

Citing differences in cost of Production, productivity levels & also as a result of pressure from Farmer's Group, some states declare state specific sugarcane prices called State Advised Prices (SAP), usually higher than FRP.

Sugar Mills are required to pay the "State Advised Price (SAP)" to sugarcane farmers irrespective of the Market Price of Sugar. Softening Sugar Prices, coupled with apprehensions of large cane crop, discouraged the sugar mills to pay higher cane prices.

The Commission for Agricultural Costs and Prices (CACP) has recommended the government to increase the fair and remunerative price for sugarcane at Rs 285 per quintal for the Sugar season 2020-21.

Given below is a chart depicting the difference in the State Advised Cane Price (SAP) during 2016-17 to 2020-21 in the major sugar producing states :

State	2016-17 (SAP)	2017-18 (SAP)	2018-19 (SAP)	2019-20 (SAP)	2020-21 (SAP)	2020-21 FRP
Bihar	280	300	300	300	315	285
Uttar Pradesh	305	315	315	315	315	285
Punjab	300	300	300	300	310	285
Haryana	315	325	325	340	350	285
Maharashtra	-	-	-	-	-	285
Karnataka	230	-	-	-	-	285

Tamil Nadu	285	-	-	-	-	285
Uttarakhand	307	316	317	317	317	285

Source: ASTA/ISMA

Note:-

- 1. Fair and Remunerative Price (FRP) for sugar season 2020-21 declared at Rs. 285 per quintal linked to a basic recovery rate of 10%; providing a premium of Rs. 2.85 per quintal for every 0.1% increase in recovery above that level. To reduce the FRP proportionately by Rs.2.85/- qtl for every 0.10% decrease in recovery below 10% but above 9.50%. Minimum FRP Rs.270.75/- qtl for 9.50% Recovery or less.
- 2. In Maharashtra, Andhra Pradesh, Tamil Nadu & Karnataka the SAP & FRP are same.
- 3. There is no change in SAP for U.P. for sugar season 2019-20.

Ethanol Manufacture:

Brazil is one of the major Bio-ethanol (from sugarcane) producers and the exporter. USA is the major producer of ethanol from corn due to abundance production of corn in the country.

Global ethanol production was dominated by the United States and Brazil, which retained their top spots, other significant producers of ethanol included China and Canada.

In India ethanol is produced mainly from molasses which is a by-product during production of sugar from sugar cane. India is the fourth largest Ethanol producer after Brazil, U.S. and China.

Ethanol is produced by the fermentation of Molasses in India, a by-product of Sugar.

45 kg of Molasses is produced from 1 ton of Cane, from which about 10 litre of Ethanol can be obtained. If the sugarcane is directly & fully used in Ethanol manufacturing, the yield of Ethanol is 70 litres per ton.

In case of B heavy molasses, 60 Kg of Molasses is produced from 1 ton of Cane from which about 18 litre of ethanol can be obtained.

In India, now ethanol manufacturing started from grain also.

Ethanol Blending Programme (EBP):

Ethanol Blended Petrol Programme was launched by the Government in 2003 on pilot basis which has been subsequently extended to the Notified 21 States and 4 Union-Territories to promote the use of alternative and environment friendly fuels. This intervention also seeks to reduce import dependence for energy requirements and give boost to agriculture sector.

Government has notified administered price of ethanol since 2014. This decision has significantly improved the supply of ethanol during the past four years. The ethanol procured by Public Sector OMCs has increased from 38 crore litre in ethanol supply year 2013-14 to estimated 457 crore litre in 2020-21.

Consistent surplus of sugar production is depressing sugar price. Consequently, sugarcane farmer's dues have increased due to lower capability of sugar industry to pay the farmers. Government has taken many decisions for reduction of cane farmer's dues.

With a view to limit sugar production in the Country, Government has taken multiple steps including, allowing diversion of B heavy molasses / sugarcane juice/Sugar syrup/Sugar for production of ethanol. As the ex-mill price of sugar has increased from the earlier estimated price, there is a need to revise price of B heavy molasses / partial sugarcane juice and 100% sugarcane juice/syrup for production of ethanol.

It is worth noting that as compared to ethanol derived from C heavy molasses route, diversion of B heavy molasses reduces the sugar and increases ethanol availability by about 100%. On the other hand, diversion of sugarcane juice reduces sugar by 100% and increases ethanol availability by about 600%.

During the year, CCEA has approved the following for the sugar season 2020-21 during ethanol supply period from various feeds:-

- Price of Ethanol from C hy Molasses increased from Rs.43.75 to Rs. 45.69 Per Litre.
- Price of Ethanol from B hy Molasses increased from Rs.54.27 to Rs. 57.61 Per Litre.
- Price of Ethanol from Sugar cane Juice/Sugar/Sugar Syrup increased from Rs. 59.48 to Rs. 62.65.
- Damaged food grain at Rs. 51.55 from Rs. 50.36 Per Litre.
- Additionally, GST and transportation charges will also be payable.
- OMCs have been advised to fix realistic transportation charges so that long distance transportation of ethanol is not disincentivised.
- OMCs are advised to prioritise ethanol from the following:-
 - 1) 100 % sugarcane juice/Syrup/sugar,
 - 2) B heavy molasses,
 - 3) C heavy molasses and
 - 4) Damaged Food grains/other sources, in that order.

Impact:

- The decision will serve multiple purposes of reducing excess sugar in the country, increasing liquidity with the sugar mills for settling cane farmer's dues and making higher ethanol available for Ethanol Blended Petrol (EBP) Programme.
- All distilleries will be able to take benefit of the scheme and large numbers of them are expected to supply ethanol for the EBP programme. Remunerative price to ethanol suppliers will help in reduction of cane farmer's arrears, in the process contributing to minimizing difficulty of sugarcane farmers.
- Ethanol availability for EBP Programme is expected to increase significantly due to higher price being offered for procurement of ethanol from B heavy molasses / sugarcane juice and 100% sugarcane juice.
- Increased ethanol blending in petrol has many benefits including reduction in import dependency, support to agricultural sector, more environmental friendly fuel, lesser pollution and additional income to farmers.

Ethanol Blending in INDIA:

- The Government is giving high importance to the ethanol blending programme, and emphasized the need to encourage more ethanol production, especially from B-molasses and cane juice, to serve the twin purposes of achieving Government's target level of blending as well as of reducing some more surplus sugar production in next year.
- Government has allowed ethanol production/ procurement from sugarcane-based raw materials viz. C & B heavy molasses, sugarcane juice / sugar / sugar syrup and surplus rice lying with Food Corporation of India (FCI).
- Supply of ethanol under the EBP Programme has increased from 38 crore litres during ESY 2013-14 to 173 crore litres during ESY 2019-20 resulting in increase in blend percentage from 1.53% to 5.00% respectively. Further, the allocation for the ongoing ESY (2020-21) has surged to 357 crore litres, which is 106% more in comparison to the ethanol supplies received during preceding ESY (2019-20).

2020-21	357.00**	8.50%

Source: NITI Ayog ** Allocated qty

- Out of the 3577 million litres finalised by the OMCs for the ethanol supply year 2020-21 (Dec.-Nov.) against total requirement of 4576 million litres, contracts for 3335 millions litres have been executed till 5th July 2021.
- Against the above, 1832 millions litres have been lifted by the OMCs.
- The total lifted quantity is 55% of the contracted quantity and 51% of the finalised quantity.
- The average blending % is 7.88% till date.

Key Government initiatives for Ethanol Manufacturing /Dispatches and Hand Sanitizer

Central Government has taken various actions/initiatives for Ethanol Blending programme which are as under:

- a) The government has approved the national Policy on Bio Fuels, which expands the scope of raw material for ethanol production beyond sugar cane molasses, by B-Heavy molasses and sugar syrup, Juice, sugar among other sugar containing crops.
- b) Allowed Manufacturing of Ethanol from B Heavy Molasses and from Sugar Cane Juice/syrup/sugar.
- c) Ethanol from B heavy and Sugar Cane Juice will result in diversion of Sugar to Ethanol.
- d) For augmentation of ethanol production capacity by setting up of new distilleries attached with their sugar mills including capacity expansion of existing distillery and for increasing ethanol production capacity by way of installation of incineration boilers or by adoption of any other method approved by CPCB for zero liquid discharge. Government will provide interest subvention @ 6% per annum or 50% of rate of interest charged by bank whichever is lower on the loan sanctioned & disbursed by banks for 5 years. This scheme further extended.
- e) Reduction of GST rates on ethanol from 18 % to 5 %.
- f) Bio enriched organic manure which is being manufacture by mixing with press mud & effluent of Distillery are included in Fertilizer Control Order 1985. This move will be beneficial to Distillery & sugar mills for disposal of manure at good return.
- g) The Central Government amend the Industrial Development Regulation Act (IDRA), 1951 in which the power of Central & State Government are clearly demarcated on Alcohol / Ethanol. This move will be beneficial as the most of the problems and hurdles are due to the control and levy of taxes & duties on Ethanol by State Governments. Most of the states have implemented the same.
- h) The Central and State Government has allowed Distilleries for manufacturing of Hand Sanitizer.

Key Government initiatives in Sugar Sector

By Central Government

- a) For the sugar session 2020-21, the FRP has been declared by the Central Government at Rs. 285 per quintal.
- b) The Central government with a view to facilitate export of sugar during the season 2020-21 hereby improving the liquidity position of sugar mills enabling them to clear the cane dues of the farmers for the season 2020-21, hereby notify the scheme for providing assistance to sugar mills for expenses on marketing cost including handling, upgrading and processing cost, which as under:-

- Total	-Rs. 4,000/- M.T.
- Ocean Freight	- Rs. 1,600/- M.T.
- Internal Transport & Freight charges including loading & unloading	- Rs 2,400/- M.T.
Above amended w.e.f. 20/05/2021 are as under:-	
- Total	- Rs. 6,000/- M.T.
- Ocean Freight	- Rs. 2,000/- M.T.
- Internal Transport & Freight charges including loading & unloading	- Rs 2,400/- M.T
- For marketing including handling & processing cost	- Rs. 1,600/- M.T.

- c) Minimum Selling Price (MSP) of sugar was first fixed at Rs. 29 per kg in June 2018 and later increased to Rs. 31 per kg in February 2019. MSP is the ex-factory price (excluding GST and transportation charges) below which no mill can sell sugar in India. Owing to India becoming a surplus sugar producer, the MSP environment is expected to continue.
- d) Quantity restriction imposed on sale of sugar from June 2018 onwards and same will be reviewed from time to time by the GOI. This will help to maintain the sugar Prices.

By State Government for the season 2020-21 (U.P./Uttrakhand)

The Uttar Pradesh & Uttarakhand Government have announced a State Advised Price(SAP) for sugarcane at Rs. 315 per quintal and Rs 317 per quintal respectively for season 2020-21.

B. OPPORTUNITIES & THREATS

Opportunities:

- Utilization of downstream by-products.
- Huge potential for increasing the High yielding cane crop to increase the cane crushing & sugar recovery rate.
- Potential for new and upgrading Technology for improved utility consumption factors and utilization of byproducts.
- Potential for downstream production of Ethanol.
- Utilisation of waste of the distilleries in a productive manner.
- Potential for New Technology for Saving in Energy.
- Introduction of National Bio Fuel Policy.
- Potential for sale of Hand sanitizer.

Threats:

- Vulnerability of sugar sector to inflation & unfavourable regulatory policies relating to fixation of higher cane prices.
- Weather conditions affecting yield and recovery.
- Deteriorating quality of soil due to overuse of fertilizer and pesticides.
- Fluctuations in selling price of finished product in domestic and global markets.
- Government policies regarding fixation of price of ethanol and power.

C. RISKS AND CONCERNS

Sugar industry being agro based is vulnerable to commodity cycles and is hence, fraught with several risks. Given below is a discussion on the risks as perceived by the management. The list is not exhaustive and meant for information purpose only for Investors who are requested to rely on their own judgement while assessing the risks associated with the Sugar Industry and your Company.

- a) **Raw material risk -** Sugarcane is the principal raw material used for sugar production. Its availability, quality, growth and cost are affecting factors. These are in turn impacted by uncontrollable factors such as:-
 - the area under sugarcane cultivation;
 - availability of water;
 - Adverse weather conditions and crop disease;
 - Availability of better and higher yielding seeds;
 - Shifting of farmers' preference to other crops;
 - Diversion of sugarcane to other industries like Gur, khandsari etc.;
 - Adequacy of harvesting and seasonal unskilled labour;
 - Un-remunerative cane procurement price;
 - High Local and State level taxes;
 - Short crop cycle;
 - Fragmented land holding low yields at farm level; and
 - Mounting cane arrears.

Risk mitigation

This risk can be mitigated by steps taken by the company through its Cane Development Programme which has yielded results in terms of high yields and recoveries. Government programme of Improved Infrastructure for roads and communication; Provision of better quality and higher yielding seeds as well as fertilizers and pesticides; Prompt clearance of the cane dues of farmers and steps to improve their goodwill by adoption of social development measures such as establishing schools and dispensaries in the command areas etc.; Diversifying into multiple locations etc.

b) <u>Regulatory Risks –</u>

i. Environmental Risks

The Industry and Company is subject to environmental regulations and may be exposed to liability as a result of our handling of hazardous materials and potential costs for environmental compliance.

ii. Government policy related Risks

The Industry is regulated and your Company operates in a regulated environment. Central and State Government policies and factors such as:-

- State Advised Price (SAP) and Fair and Remunerative Price (FRP) for sugarcane;
- Control on sale of Molasses; affect the agricultural sector and related industries and in turn our operations and profitability.

Risk mitigation

The regulatory risks listed above are Government policy driven and beyond Company's control and cannot be alleviated unless the industry is completely decontrolled. Every effort is made to conform to regulatory requirements while judicial recourse is made when warranted. Various representations through the body of the industry like ISMA, UPSMA, and UPDA submitted to the Government to come out with the solutions regarding above risks.

c) Sugar Price Risk

Sugar prices in the Domestic and International markets depend primarily on the supply and demand situation. Global prices influence and affect the domestic prices directly and sale of Molasses controlled by the respective States. Fluctuations in demand and supply arise on account of the changes in the availability and price of sugarcane, variances in the production capacities of our competitors, availability of substitutes for the sugar products and international demand and supply position.

Risk mitigation

Your Company is unable to mitigate this risk since one does not have any control on the market forces and the regulatory prices. The wholesale price of sugar has a significant impact on our profits. Like other agricultural commodities, sugar is subject to price fluctuations resulting from weather, natural disasters, domestic and foreign trade policies, shifts in supply and demand and other factors beyond our control. Additionally, 15% to 30% of the total Global sugar production is traded on commodity exchanges which are speculative in nature and can adversely affect the global sugar prices and in turn the operations of your Company.

However, your Company is trying to reduce the impact of this risk by foraying into newer markets, entering the export market, more value addition by concentrating on downstream projects, increasing the quality and volume etc.

Branded Sugar

Uttam Sugar Mills Limited produces one of the finest quality sugars in India. The Sugar that we are currently packing is from our sugar plant situated at Libberheri, Roorkee. The quality/purity of sugar is one of the best in the country as we are packing the quality of sugar accepted by European Union Standard. From last three year onwards your company has entered into a very speciality products of Sugar in the aforesaid plant, these speciality product include Bura, Brown Sugar, Table Sugar, Sachets (Both in institutional and retail trade), icing sugar, superfine, pharma sugar, cube sugar, invert syrup etc and sugar in the different packaging i.e. 80 gm /1Kg /2 kg/ 5Kg / 10Kg.

We have also started the manufacturing of brown sugar at our Khaikheri Unit.

Our packaged sugar is already selling in J&K, Himachal Pradesh, Punjab, Haryana, Delhi, Uttarakhand, Uttar Pradesh, Gujarat, Chandigarh, Rajasthan, Bihar, Assam and Madhya Pradesh through our distributors in the respective areas. We have already covered Modern Retails like Big Basket, Grofers, Big Bazaar, Kendriya Bhandar, Easy Day, Mother Dairy, Bikanerwala, Britannia, CCD, Rasna, Amazon, Vestige etc.

Uttam Sugar is a very quality centric company and the same will be reflected in our products to come. Our future plans are very ambitious and we want to push Packaged Sugar in Market very aggressively. We would like to inform you that very soon we will be introducing other products along with our existing products.

We have also increased our branded sugar sale at Libberheri unit from 3% in 2011-12, 53% in 2019-20 and 54 % in 2020-21.

d) Cyclical Risk

The industry is dependent on monsoons for both production and price realisation. Moreover, switching to other crops by cane growers on account of better returns affect the Industry.

Risk mitigation

Your Company is unable to mitigate this risk since one does not have any control on the cyclical nature of the industry. However, Governmental initiatives to improve the irrigation by introducing various schemes as well as improvement in the distribution system by augmentation of the Canal Irrigation and tapping of the available surpluses of water are expected to mitigate this risk significantly.

e) Finance Risk

The Industry is dependent on the availability of timely working capital at competitive interest rates and Long Term Finance for capacity enhancements / economic size of mills as well as for the manufacture of by-products.

Risk mitigation

Your Company is facing severe financial constraints. However, it is approaching Banks for funding/finance.

D. INTERNAL CONTROL SYSTEMS AND THEIR ADEQUACY

Broadly, the areas of operation have been classified as Procurement, Manufacture, Marketing and Finance, in the functioning of which, various checks and control systems have been incorporated as Standard Operating Procedures. Even though they are considered adequate to reasonable safeguard its interests, a continuous review is undertaken for further improvement since the management gives lot of emphasis on continuous up gradation of business processes and adherence to the designed system and processes.

Moreover, there is an adequate and effective internal audit system in place in your Company that employs periodic checks on the various systems and on-going process. The Audit Committee of the Board of Directors of your Company comprising of reputed professionals, regularly reviews the effectiveness of internal control system and suggests changes wherever necessary, to ensure due and proper compliance with applicable laws, accounting standards and regulatory guidelines presently in vogue.

F. MATERIAL DEVELOPMENTS IN HUMAN RESOURCES/INDUSTRIAL RELATIONS FRONT

Industrial relations in your Company have remained cordial throughout the year under review. As a result of huge gap between the cane price and the selling price of sugar, there is a severe financial crisis in the sugar industry on the whole. This has resulted into cost reduction measures but that has not affected harmonious human development relations.

Your Company has overcome all this by upgrading the process and the systems that help harmonize culture of the varied manpower arising out of diverse sources and backgrounds. The organization values and human development as one of the cardinal principle in the growth of the Company. The organization has steadfastly stuck to its vision to enhance knowledge, skills and competencies of the human resources pool- helping them develop individually and collectively thereby improving productivity. To achieve all this, the Company is providing compensation by way of salary and wages which is at par with the prevailing standards in the industry. The Company is also in the midst of providing regular training to the employees for up-gradation of skills at various levels.

With these progressive steps, your Company has been able to maintain cordial relations with its employees even in this crucial time.

Audited Financial Statements for the Financial Year 2020-21

INDEPENDENT AUDITOR'S REPORT

TO THE SHAREHOLDERS OF UTTAM SUGAR MILLS LIMITED

Report on the Audit of the IND AS Financial Statements

Opinion

We have audited the accompanying financial statements of **UTTAM SUGAR MILLS LIMITED** ("the Company"), which comprise the Balance Sheet as at March 31, 2021, the Statement of Profit and Loss and the Statement of Changes in Equity and the Statement of Cash Flows for the year ended on that date and notes to financial statement including a summary of the significant accounting policies and other explanatory information (hereinafter referred to as "the financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2021, the profit, changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the ethical requirements that are relevant to our audit of the financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report:-

S.NO	KEY AUDIT MATTERS	AUDITOR'S RESPONSE
1.	Revenue recognition Refer to note no. 2.5 to the financial statements. The Company principally generates revenue from sale of Sugar (domestic and Export) and sale of its By-products, sale of distillery products, sale of Hand sanitizer, sale of jaggery and sale of Power in domestic market. We identified revenue recognition as a key audit matter because it is one of the key performance indicator of the Company and gives rise to an inherent risk of misstatement to meet expectations or targets.	 Our audit procedures, amongst others, included the following: Obtaining an understanding of the process relating to recording of sales and testing the design, implementation and operating effectiveness of relevant key internal controls over recording of sales; Assessing the appropriateness of the Company's accounting policy for recording of sales and compliance of the policy with applicable accounting standards; Comparing a sample of sale transactions recorded during the year with sales orders, sales invoices, delivery challans and other relevant underlying documents; Comparing a sample of sale transactions recorded near the year end with the sales orders, sales invoices, delivery challans and other relevant underlying documents; Comparing a sample of sale transactions recorded near the year end with the sales orders, sales invoices, delivery challans and other relevant underlying documentation to assess if the sale was recorded in the appropriate accounting period; Comparing a sample of electricity sales transactions with energy invoices duly verified

	 by Central Power Purchasing Agency (Guarantee) Limited ("CPPA-G") and assessed whether the sale was recorded in the appropriate accounting period; Inspecting on a sample basis, credit notes issued near to and subsequent to year end to evaluate whether the adjustments to sales had been accurately recorded in the appropriate accounting period; and Scanning for any manual journal entries relating to sales recorded during and near the year end which were considered to be material or other specific risk based criteria for inspecting underlying documentation.
Capitalization of property, plant and equipment	Our audit procedures, amongst others, included
Refer note no. 3 to the financial statements. The Company has made significant capital expenditure on New Plant, modernization and replacement of plant and equipment.	 the following: Obtaining an understanding of and testing the design, implementation and operating effectiveness of management's key internal control over capital expenditure;
We identified capitalization of property, plant and equipment as a key audit matter because there is a risk that amounts being capitalized may not meet the capitalization criteria with related implications on depreciation charge for the year.	 Comparing, on sample basis, the costs incurred on projects with supporting documentation and contracts; Assessing the nature of costs incurred for the capital projects for appropriateness by comparing, on sample basis, amounts recorded with underlying documentation and considering that the expenditure meets the criteria for capitalization as per the applicable accounting standards;
	 Inspecting supporting documents for the date of capitalization when project assets were ready for its intended use to assess that depreciation commenced and further capitalization of costs ceased from that date and to assess the useful life assigned by management including testing the calculation of related depreciation.
Valuation of Inventories	Our audit procedures, amongst others, included
Refer note no. 9 to the financial statements. We identified valuation of inventories as a key audit matter as it involves significant management judgments in determining the carrying value of stock.	 the following: Assessing the appropriateness of Company's accounting policy for valuation of stock and compliance of the policy with the requirements of the prevailing accounting standards; Obtaining an understanding of internal controls over valuation of stock and testing, on a sample basis, their design, implementation and operating effectiveness; Obtaining an understanding and assessing reasonableness of the management's determination of net realizable value (NRV) and the key estimates adopted, including future selling prices and costs necessary to
	 Refer note no. 3 to the financial statements. The Company has made significant capital expenditure on New Plant, modernization and replacement of plant and equipment. We identified capitalization of property, plant and equipment as a key audit matter because there is a risk that amounts being capitalized may not meet the capitalization criteria with related implications on depreciation charge for the year. Valuation of Inventories Refer note no. 9 to the financial statements. Information Other than the Financial Statements and Auditor's Report Thereon

The Company's Board of Directors is responsible for the preparation of the other information. The other information comprises the information included in the Management Discussion and Analysis, Board's Report including Annexures to Board's Report, Business Responsibility Report, Corporate Governance Report and Shareholder's Information, but does not include the financial statements and our auditor's report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management's Responsibility for the Financial Statements

The Company's Board of Directors is responsible for the matters stated in section 134(5) of the Act with respect to the preparation of these financial statements that give a true and fair view of the financial position, financial performance, changes in equity and cash flows of the Company in accordance with the accounting principles generally accepted in India including the Indian accounting standards (Ind AS) specified under section 133 of the Act. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so.

The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may

cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.

• Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

- As required by the Companies (Auditor's Report) Order, 2016 ("the Order") issued by the Central Government in terms of Section 143(11) of the Act, we give in "Annexure A" a statement on the matters specified in paragraphs 3 and 4 of the Order.

Annexure - B to the Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

We have audited the internal financial controls over financial reporting of **Uttam Sugar Mills Limited** ("the Company") as at 31st March, 2021 in conjunction with our audit of the financial statements of the Company for the period ended on that date.

Management's Responsibility for Internal Financial Controls

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to Company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A Company's internal financial control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A Company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future

periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Opinion

In our opinion, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at 31st March, 2021, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Note No. 2 : Significant Accounting Policies

2.1 Statement of compliance with Ind AS

The financial statements of the Company have been prepared to comply with the Indian Accounting Standards ('Ind AS') notified under Companies (Indian Accounting Standards) Rules, 2015 (as amended with effect from 1st April, 2016) read with Section 133 of the Companies Act, 2013.

All the Ind AS issued and notified by the Ministry of Corporate Affairs under the Companies (India Accounting Standards) Rules 2015 (As amended) till the financial statements are approved for issue by the Board of Directors has been considered in preparing these financial statements.

2.2 Basis of preparation

These financial statements have been prepared in accordance with Ind AS under the historical cost basis except for the following:-

- i) Certain financial assets and financial liabilities measured at fair value and
- ii) Defined benefits plan- plan assets measured at fair value.

Historical cost is generally based on the fair value of the consideration is exchange for goods and service.

2.3 The Company presents assets and liabilities in the balance sheet based on current/non-current classification. An asset is treated as current when it is:

- i) Expected to be realized or intended to be sold or consumed in normal operating cycle,
- ii) Held primarily for the purpose of trading,
- iii) Expected to be realized within twelve months after the reporting period,
- iv) Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period, or
- v) Carrying current portion of non-current financial assets.

All other assets are classified as non-current.

A liability is current when:

- i) It is expected to be settled in normal operating cycle,
- ii) It is held primarily for the purpose of trading,
- iii) It is due to be settled within twelve months after the reporting period,
- iv) There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period, or
- v) It includes current portion of non-current financial liabilities.

All other liabilities are classified as non-current.

Notes on Financial Statements for the Year ended 31st March, 2021

2.4 Recent accounting pronouncements

Ministry of Corporate Affairs ("MCA") notifies new standard or amendments to the existing standards. There is no such notification which would have been applicable from 1st April, 2021. MCA issued notifications dated 24th March, 2021 to amend Schedule III to the Companies Act, 2013 to enhance the disclosure required to be made by the Company in its financial statements. These amendments are applicable to the Company for the financial year starting 1st April, 2021.

2.5 Revenue recognition

Revenue is recognized to the extent it is probable that the economic benefits will flow to the Company and revenue can be reliably measured. The Company recognizes sale of goods when the significant risks and rewards of ownership are transferred to the Buyer, usually on delivery of goods.

Revenue is measured at the fair value of the consideration received / receivable taking into account contractually defined terms of payment net of discounts, volume rebates and excluding taxes or duties collected on behalf of the Government.

Revenue from sale of power is recognized when the units generated are transmitted to the pooling station, in accordance with the terms and conditions of the power purchase agreement entered into by the Company with the purchasing parties.

Income from sale of REC is recognized on delivery of REC to the customers 'account.

Interest income from a financial asset is recognized when it is probable that the economic benefits will flow to the Company and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the "effective interest rate" that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's gross carrying amount.

Insurance claims are accounted for on the basis of claims admitted / expected to be admitted and to the extent that there is no uncertainty in receiving the claims.

All other incomes are accounted for on accrual basis.

2.6 Expenses

All expenses are accounted for on accrual basis.

2.7 Property, plant and equipment and Capital work in progress (CWIP)

All property, plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses, if any. Free hold land is not depreciated. The cost of an asset includes the purchase cost of materials, including import duties and non-refundable/ creditable taxes and any directly attributable cost of bringing an asset to the location and condition of its intended use interest on borrowing used to finance the construction of qualifying assets are capitalized as part of the cost of the asset until such time that the asset is ready for its intended use.

When significant parts of property, plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. Likewise, when a major refurbishment is performed, its cost is recognized in the carrying amount of the plant and equipment as a replacement if the recognition criteria are satisfied. All other repairs and maintenance costs are recognized in statement of profit and loss as incurred.

Directly attributable expenditure (including finance cost relating to borrowed funds for construction or acquisition of fixed assets) incurred on projects under implementation are treated as pre-operative expenses pending allocation to the assets and are shown under CWIP. CWIP is stated at the amount expended up to balance sheet date on assets or property, plant and equipment that are not yet ready for their intended use.

When parts of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment.

The cost and related accumulated depreciation are eliminated from the financial statements upon disposal/ sale or retirement of the asset and the resultant gains or losses (difference between the sale proceeds and the carrying amount of the assets) are recognized in the Statement of profit and Loss.

Notes on Financial Statements for the Year ended 31st March, 2021

2.8 Depreciation methods, estimated useful lives and residual value

- a) Depreciation on tangible fixed assets is provided on Straight Line basis so as to charge the cost of the assets or the amount substituted for costs in case of revalued assets less its residual value over the useful life of the respective asset as prescribed under part C of Schedule II of the Companies Act, 2013. Residual value has been considered as 5% of the cost of the respective assets.
- b) Leasehold Building Developments are amortized at lower of period of lease or ten years.
- c) Intangible Assets are amortized over a period of economic benefits not exceeding ten years.
- d) Depreciation/amortization on assets added, sold or discarded during the year is provided on pro rata basis.

2.9 Intangible assets (Computer software)

Intangible assets are stated at cost of acquisition net of recoverable taxes less accumulated amortization/ depletion and impairment loss, if any. The cost comprises purchase price, borrowing costs, and any cost directly attributable to bringing the asset to its working condition for the intended use. Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the Statement of profit and loss when the asset is derecognized. Computer software is amortized over a period of three years.

2.10 Inventories

Inventories (other than By-products) are valued at lower of cost or net realizable value.

Inventories of Renewal Energy Certificates (REC) are valued at lower of cost or net realizable value.

Inventories on stock in trade are valued at lower of cost or net realizable value.

Cost of inventories has been determined on current cost.

Cost of finished goods and Work in Progress has been worked out on absorption cost basis.

By-products and residuals are valued at net realizable value.

2.11 Government Grants

Government grants are recognized at fair value when there is reasonable assurance that the grant would be received and the Company would comply with all the conditions attached with them.

Government grants related to PPE are treated as deferred revenue (included under non-current liabilities with current portion considered under current liabilities) and are recognized and credited in the statement of profit and loss on systematic and rational basis and included under other income.

Government grants related to revenue nature are recognized on a systematic basis in the Statement of profit and Loss over the periods necessary to match them with the related costs which they are intended to compensate and are adjusted with the related expenditure.

(If not related to a specific expenditure, it is taken as income and presented under other Income)

2.12 Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of assets are capitalized as part of the cost of such assets. A qualifying asset is one that necessarily takes substantial period of time to get ready for its intended use. Interest income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalization. All other borrowing costs are charged to the profit and loss statement in the period in which they are incurred.

2.13 Leases

The Company evaluates if an arrangement qualifies to be a lease as per the requirements of a lease requires significant judgement. The Company uses significant judgement in assessing the lease term (including anticipated renewals) and the applicable discount rate.

The Company determines the lease term as the non-cancellable period of a lease, together with both periods covered by an option to extend the lease if the company is reasonably certain to exercise that option, and periods covered by an option to terminate the lease if the company is reasonably certain not to exercise that option. In assessing whether the company is reasonably certain to exercise an option to terminate a lease, it considers all relevant facts and circumstances that create an economic incentive for the company to exercise the option to extend the lease, or not to exercise the option to terminate the lease term if there is a change in the non-cancellable period of a lease.

Notes on Financial Statements for the Year ended 31st March, 2021

2.14 Provisions, contingent liabilities and contingent assets.

Provisions involving substantial degree of estimation in measurement are recognized when there is a present obligation as a result of past events and it is probable that there will be an outflow of resources.

If the effect of the time value of money is material, provisions are determined by discounting the expected future cash flows at current pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability when discounting is used, the increase in the passage of time is recognized as finance costs.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an out flow of recourses will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is liability that can't be recognized because it can't be measured reliably.

A contingent liability is not recognized in the financial statements, but discloses its existence in the Financial Statement

When the realization of income is virtually certain, then the related asset is no longer a contingent asset, and is recognized as an asset.

Provisions, contingent liabilities and contingent assets are reviewed at each balance sheet date.

2.15 Dividend payable

Final dividend on shares is recorded as a liability on the date of approval by the shareholders and interim dividend are recorded as a liability on the date of declaration by the Company's Board of Directors. A corresponding amount is recognized directly in equity.

2.16 Foreign currency transactions

Transactions in foreign currency are recorded at the exchange rate prevailing on the date of transaction. Monetary items denominated in foreign currencies at the year ended translated at the year ended rates which is likely to be realized from, or required to disburse at the balance sheet date. Exchange differences arising on settlement of monetary items at rates different from those at which they were initially recorded / reported in financial statements are recognized as income or expense in the year in which they arise.

Non-monetary items which are carried at historical cost denominated in a foreign currency are translated using the exchange rate at the date of the initial transaction.

2.17 Employee benefits

- a) Short-term employee benefits are recognized as an expense at the undiscounted amount in the Statement Profit & Loss Account of the period in which the related service is rendered.
- b) Long-term employee benefits are recognized as an expense in the Statement Profit & Loss Account for the year in which the employee has rendered services.

i) Compensated absences

Accumulated leave, which is expected to be utilized within next 12 months, is treated as short term employee benefit and this is shown under current provisions in the Balance Sheet. The Company treats accumulated leave expected to be carried forward beyond twelve months, as Long term employee benefits and shown under Long term provisions in the Balance sheet.

ii) Defined Benefit Plans

The Company provides for retirement benefits in the form of gratuity. The Company's liability towards this benefit is determined on the basis of actuarial valuation using projected unit credit method at the date of Balance sheet. Actuarial gain and Losses in respect of such benefits are recognized in Statement of Profit & Loss A/c.

2.18 Financial instruments

A Financial instrument is any contract that gives rise to financial assets of one entity and a financial liability or equity instrument of another party.

Notes on Financial Statements for the Year ended 31st March, 2021

A. Financial Assets

a. Initial recognition

The Company classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement. Financial instruments are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial instruments are recognized initially at fair value plus transactions costs that are directly attributable to the acquisition or issue of the financial instrument, except for financial assets at fair value through statement of profit and loss, which are initially measured at fair value, excluding transaction costs (which is recognized in statement of profit and loss).

b. Subsequent measurement

i) Financial assets carried at amortized cost (AC)

A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

ii) Financial assets at fair value through other comprehensive income (FVTOCI)

A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

iii) Financial assets at fair value through statement of profit and loss (FVTPL)

Equity instruments

All equity investments in scope of Ind AS 109 are measured at fair value either as at FVTOCI or FVTPL. The Company makes such election on instrument-by-instrument basis. For equity instruments measured as at FVTOCI, all fair value changes on the instrument, excluding dividends, are recognized in the OCI. Equity instruments included within the FVTPL category are measured at fair value with all changes recognized in the Statement of Profit & Loss account.

c. De-recognition

A Financial Assets (or where applicable, part of financial assets) is primarily derecognized when:

- 1. The contractual right to receive cash flows from the assets have expired or
- 2. The Company has transferred its right to receive cash flow from the financial assets and subsequently all the risks and rewards of ownership of the assets to third party.

d. Reclassification of financial assets

Company determines the classification of financial assets and liabilities on initial recognition. After initial recognition, no reclassification is made for financial assets which are equity instruments and financial liabilities.

e. Impairment of financial assets

The Company recognized loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through Statement of Profit and loss. Loss allowance for trade receivable with no significant financing component is measured at an amount equal to life time ECL.

For all other financial assets, expected credit loss are measured at an amount equal to the twelve month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL.

B. Financial liabilities

a. Initial recognition and measurement

All financial liabilities are recognized initially at fair value and in case of loans and borrowings and payables, net of directly attributable cost. The Company's financial liabilities include trade and other payable, loans and

Notes on Financial Statements for the Year ended 31st March, 2021

borrowing including bank over drafts, financial guarantee contracts and derivative financial instruments. Fees of recurring nature are directly recognized in statement of profit and loss as finance cost.

b. Subsequent measurement

Financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.

i) Loans and borrowings

After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate (EIR) method. Gains and losses are recognized in statement of profit and loss when liabilities are de-recognized. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance cost in the statement of profit and loss.

ii) Compound financial instruments

At the issue date the fair value of the liability component of a compound instrument is estimated using the market interest rate for a similar non-convertible instrument. This amount is recorded as a liability at amortized cost using the effective interest method until extinguished upon conversion or at the instrument's redemption date. The equity component is determined as the difference of the amount of the liability component from the fair value of the instrument. This is recognized in equity, net of income tax effects, and is not subsequently re-measured.

c. De-recognition of financial instruments

A financial liability is derecognized where the obligation under the liability is discharged or cancelled or expires where an existing financial liability is replaced by another from the same tender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of new liability. The difference in the respective carrying amounts is recognized in the statement of Profit and Loss.

d. Offsetting of financial instruments

Financial assets and financial liabilities including derivative instruments are offset and the net amount is reported in the Balance sheet, if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis or to realize the assets and settle the liabilities simultaneously.

e. Fair value measurement

Fair value is a market-based measurement, not an entity-specific measurement. Under Ind AS, fair valuation of financial instruments is guided by Ind AS 113 "Fair Value Measurement" (Ind AS – 113).

For some assets and liabilities, observable market transactions or market information might be available. For other assets and liabilities, observable market transactions and market information might not be available. However, the objective of a fair value measurement in both cases is the same to estimate the price at which an orderly transaction to sell the asset or to transfer the liability would take place between market participants at the measurement date under current market conditions (i.e. an exit price at the measurement date from the perspective of a market participant that holds the asset or owes the liability).

Three widely used valuation techniques specified in the said Ind AS are the market approach, the cost approach and the income approach which have been dealt with separately in the said Ind AS.

Each of the valuation techniques stated as above proceeds on different fundamental assumptions, which have greater or lesser relevance, and at times there is no relevance of a particular methodology to a given situation. Thus, the methods to be adopted for a particular purpose must be judiciously chosen. The application of any particular method of valuation depends on the Company being evaluated, the nature of industry in which it operates, the Company's intrinsic strengths and the purpose for which the valuation is made.

Notes on Financial Statements for the Year ended 31st March, 2021

In determining the fair value of financial instruments, the Company uses a variety of methods and assumptions that are based on market conditions and risks existing at each balance sheet date.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1 : Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 : Inputs for the assets or liabilities that are not based on observable market data (unobservable inputs)

f) Share capital

An equity instrument is a contract that evidences residual interest in the assets of the Company after deducting all of its liabilities. Incremental costs directly attributable to the issuance of new equity shares are recognized as a deduction from equity, net of any tax effects.

2.19 Impairment Non-financial assets

The carrying amount of any property, plant and equipment and intangible assets with finite lives are reviewed at each balance sheet date, if there is any indication of impairment based on internal /external factor. An asset is impaired when the carrying amount of the asset exceeds the recoverable amount. Recoverable amount is higher of an asset's or cash generating unit's net selling price and its value in use. Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets.

An impairment loss is charged to the Statement of Profit and loss in the year in which an asset is identified as impaired. An impairment loss recognized in prior accounting periods is reversed if there has been change in the estimate of the recoverable amount. At each balance sheet date, the Company assesses whether there is any indication that any property, plant and equipment and intangible assets with finite lives may be impaired. If any such impairment exists, the recoverable amount of an asset is estimated to determine the extent of impairment. If at the balance sheet date there is an indication that a previously assessed impairment loss no longer exists, the recoverable amount but not exceeding written down value which would have been reported if the impairment loss had not been recognized.

2.20 Taxes

Income tax expense comprises current tax and deferred tax and is recognized in the Statement of Profit and Loss except to the extent it relates to items directly recognized in Equity or in Other Comprehensive Income (OCI).

Current tax

Provision for current tax is made with reference to taxable income computed for the accounting period for which the financial statements are prepared by applying the tax rates and laws that are enacted or substantively enacted at the balance sheet date. The tax is recognized in statement of profit and loss, except to the extent that it related to items recognized in the OCI or in other equity. In this case, the tax is also recognized in other comprehensive income and other equity.

Deferred tax

Deferred tax is recognized using the balance sheet approach. Deferred tax assets and liabilities are recognized for deductible and taxable temporary differences arising between the tax base of assets and liabilities and their carrying amount in financial statements, except when the deferred tax arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination and affects neither accounting nor taxable profits or loss at the time of the transaction.

Deferred tax assets are recognized for deductible temporary differences, the carry forward of unused tax credits and any unused tax losses to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax losses can be utilized.

Notes on Financial Statements for the Year ended 31st March, 2021

The carrying amount of deferred tax assets is reviewed at each balance sheet date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax assets to be recovered.

Unrecognized deferred tax assets are re-assessed at each balance sheet date and are recognized to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the balance sheet date.

Deferred tax assets and deferred tax liabilities are offset if a legally enforceable right exists to set off deferred tax assets against deferred tax liabilities and the deferred taxes relate to the same taxable entity and the same taxation authority.

2.21 Earnings per Share

The Company presents basic and diluted earnings per share ("EPS") data for its equity shares. Basic EPS is calculated by dividing the profit/loss before other comprehensive income/loss for the year attributable to equity shareholders of the Company by the weighted average number of equity shares outstanding during the period. Diluted EPS is determined by adjusting the profit/loss before other comprehensive income/loss for the year attributable to equity shareholders and the weighted average number of equity shares outstanding for the year attributable to equity shareholders and the weighted average number of equity shares outstanding for the effects of all dilutive potential equity shares.

2.22 Non-current assets (or disposal groups) held for sale and discontinued operations

a) Non-current assets (or disposal groups) are classified as held for sale if their carrying amount would be recovered principally through a sale/distribution rather than through continuing use and a sale/distribution is considered highly probable.

Actions required to complete the sale/distribution should indicate that it is unlikely that significant changes to the sale/ distribution would be made or that the decision to sell/distribute would be withdrawn. Management must be committed to sale/distribution expected within one year from the date of classification.

b) Immediately before the initial classification of the assets (and disposal groups) as held for sale, the carrying amount of the assets (or all the assets and liabilities in the disposal groups) are measured in accordance with their applicable accounting policy.

Non-current assets (or disposal groups) held for sale/for distribution to owners are subsequently measured at the lower of their carrying amount and fair value less costs to sell, except for assets such as deferred tax assets, assets arising from employee benefits and financial assets which are specifically exempt from this requirement.

- c) Non-current assets including those that are part of a disposal group (PPE and Intangible assets) once classified as held for sale/ distribution to owners are neither depreciated nor amortized. Interest and other expenses attributable to the liabilities of a disposal group classified as held for sale continue to be recognized.
- d) Non-current assets (including assets of a disposal group) classified as held for sale are presented separately from the other assets in the Balance sheet. The liabilities of a disposal group classified as held for sale/ distribution are presented separately from other liabilities in the Balance sheet.
- e) A disposal group qualifies as discontinued operation, if it is a component of equity that has either being disposed of or is classified as Held for sale, and that represents a separate major line of business or geographical area of operations, or is part of a single co-ordinate plan to dispose of a separate major line of business or geographical area of operations or is a subsidiary exclusively with a view to resale.

Discontinued operations are excluded from the results of continuing operations and are presented separately as a single amount as profit or loss after tax from discontinued operations in the Statement of Profit and Loss and comparative information is restated accordingly.

f) All notes to the financial statements mainly include amounts for continuing operations, unless stated otherwise

2.23 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. Revenue and expenses are identified to segments on the basis of their relationship to the operating activities of the segment. Inter segment revenue are accounted for based on the cost price. Revenue, expenses, assets and liabilities which are not allocable to segments on a reasonable basis, are included under "Unallocated revenue/ expenses/ assets/ liabilities".

Notes on Financial Statements for the Year ended 31st March, 2021

The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Managing Director who makes strategic decisions.

The accounting policies adopted for segment reporting are in line with the accounting policies adopted for preparing and presenting the financial statements of the Company as a whole.

2.24 Cash and cash equivalents

Cash and cash equivalents in the Balance sheet comprise cash on hand, cheques on hand, balance with banks on current accounts and short term, highly liquid investments with an original maturity of three months or less and which carry insignificant risk of changes in value.

For the purpose of the Cash Flow Statement, Cash and cash equivalents consist of Cash and cash equivalents, as defined above and net of outstanding book overdrafts as they are considered an integral part of the Company's cash management.

2.25 Cash Flow Statement

Cash flows are reported using the indirect method, whereby profit/loss before tax is adjusted for the effects of transactions of a non-cash nature, any deferrals or accruals of past or future operating cash receipts or payments and item of income or expenses associated with investing or financing flows. The cash flows from operating, investing and financing activities of the Company are segregated.

Note No. : 2 A Significant Accounting Judgement, Estimates and Assumptions

The preparation of the financial statements requires the use of accounting estimates, which, by definition would seldom equal the actual results. Management also needs to exercise judgement and make certain assumptions in applying the Company accounting policies and preparation of financial statements.

The use of such estimates, judgements and assumptions affect the reported amounts of revenue, expenses, assets and liabilities including the accompanying disclosures and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in the future periods.

Estimates and judgements are continually evaluated. They are based on historical experience and other factors including expectations of future events that may have a financial impact on the Company and that are believed to be reasonable under the circumstances.

Estimates and Assumptions

The Company has based its assumptions and estimates on parameters available when the financial statement was prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are described below.

- i) Estimations of uncertainties relating to the global health pandemic from COVID-19: The Company has considered the possible impact of internal and external factors that may result from the pandemic relating to COVID-19 known to the management up to date of approval of these accounts, to assess and finalize the carrying amount of assets and liabilities. In developing the assumptions relating to the possible future uncertainties in the global economic conditions because of pandemic, the company, as at the date of approval of these financial statements has used internal and external sources of information including credit reports and related information, economic forecasts. The Company has performed sensitivity analysis on the assumptions used and based on current estimates expects the carrying amount of these assets will be recovered. The impact of COVID-19 on the Company's financial statements may differ from that estimated as at the date of approval of these condensed financial statements.
- ii) Depreciation and useful lives of property, plant and equipment: Property, plant and equipment are depreciated over the estimated useful lives of the assets, after taking into account their estimated residual

Notes on Financial Statements for the Year ended 31st March, 2021

value. Management reviews the estimated useful lives and residual values of the assets annually in order to determine the amount of depreciation to be recorded during any reporting period. The useful lives and residual values are based on the Company's historical experience with similar assets and take into account anticipated technological changes. The depreciation for future periods is adjusted if there are significant changes from previous estimates.

- iii) Income Tax: Management judgement is required for calculation of income tax and deferred tax assets and liabilities. Deferred tax assets are recognized for unused losses (carry forward of prior years' losses) to the extent that it is probable that taxable profit would be available against which the losses could be utilized. The Company reviews at each balance sheet date the carrying amount of deferred tax. The factor used in estimate may differ from actual outcome which may lead to significant adjustment in the amounts in financial statement.
- iv) Recoverability of trade receivable: Judgements are required in assessing the recoverability of overdue trade receivables and determining whether a provision against those receivables is required. Factors considered include the credit rating of the counterparty, the amount and timing of anticipated future payments and any possible actions that can be taken to mitigate the risk of non-payment.
- v) Provisions: Provisions and liabilities are recognized in the period when it becomes probable that there will be a future outflow of funds resulting from past operations or events and the amount of cash outflow can be reliably estimated. The timing of recognition and quantification of the liability require the application of judgement to existing facts and circumstances, which can be subject to change. Since the cash outflows can take place many years in the future, the carrying amounts of provisions and liabilities are reviewed regularly and adjusted to take account of changing facts and circumstances.
- vi) Impairment of non-financial assets: The Company assesses at each reporting date whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the Company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or CGU's fair value less costs of disposal and its value in use. It is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets. Where the carrying amount of an asset or CGU exceeds its recoverable amount, the asset is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using pretax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transaction are taken into account, if no such transactions can be identified, an appropriate valuation model is used.
- vii) Estimation of Defined benefit obligations: The Company's obligation on account of gratuity and compensated absences is determined based on actuarial valuation.

An actuarial valuation involves making various assumptions that may differ from actual developments in the future. These include the determination of the discount rate, future salary increases and mortality rates. Due to the complexities involved in the valuation and its long-term nature, a defined benefit obligation is highly sensitive to changes in these assumptions. All assumptions are reviewed at each financial year end.

- viii)Impairment of financial assets: The impairment provisions for financial assets are based on assumptions about risk of default and expected cash loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.
- ix) Fair value measurement of financial instruments: The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year. The Company based its assumptions and estimates on parameters available when the financial statements were prepared.

Notes on Financial Statements for the Year ended 31st March, 2021

Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company. Such changes are reflected in the assumptions when they occur.

x) Material uncertainty about going concern: In preparing financial statements, management has made an assessment of Company's ability to continue as a going concern. Financial statements are prepared on a going concern basis. The Management is aware, in making its assessment, of material uncertainties related to events or conditions that may cast significant doubt upon the Company's ability to continue as a going concern.

- t. Pursuant to The Taxation Laws (Amendment) Act, 2019 dated September 20, 2019 the Government of India inserted section 115BAA in the Income Tax Act, 1961 which provides domestic companies a non-reversible option to pay corporate tax reduced rates effective from April 01,2019 subject to certain conditions. The Company has during the year, re-evaluated and made as assessment of its impact and finally decided to opt for reduced rates as per Section 115 BAA of the Income Tax Act, 1961. The Company re-measured its deferred tax balances at reduced tax rates and consequentially deferred tax expenses of Rs.916.02 lakhs for the year has been charged to Statement of Profit and Loss and MAT assets of Rs.1998.09 has been written off during the year.
- u. The realization of deferred tax assets in respect of unabsorbed depreciation is depended on the generation of future taxable income. Based on the profit during the year and in immediate preceding year, increase in sugar recovery supported by cane development activities, distillery working and projections of future taxable income over the period in which the deferred tax assets are deductible, management believes that the Company will realize the deferred tax assets in respect of unabsorbed depreciation.
- Due to COVID-19 outbreak globally in 2020 and continued in 2021, to control the same the Central Government v. announced national lockdown as well as lock down announced by the State Government from time to time, which caused disruption of supply of goods across business and industries. However, sugar business continued without significant disruption being classified as essential product except reduction of demand from institutional buyer like beverages, restaurant etc.

The Company has considered the possible effects that may result for the pandemic relating to COVID 19 on its business operations and financial position using internal & external factors known to the management up to the approval of financial statement. There is no significant impact on the carrying amount of its assets and financial result as on 31st March, 2021 and management concludes that no material uncertainty exists about the company's ability to continue as a going concern and accordingly financial statements have been prepared using going concern assumption.

(Rs. in Lakhs)

Notes on Financial Statements for the Year ended 31st March, 2021

The impact of COVID-19 on the company's financial statements may differ from that estimated as at the date of approval of these financial statements due to uncertainty associated with COVID-19 nature and duration. The company will continue to monitor any material change in future economic conditions.

Note No. 35 : Financial Risk Framework

The Company's financial liabilities comprise borrowings, capital creditors and trade and other payables. The main purpose of these financial liabilities is to finance the Company's operations. The Company's financial assets include Loans, trade and other receivables, cash and cash equivalents.

The Company is exposed to market risk, credit risk and liquidity risk. The Company's senior management overseas the management of these risks. The Company's senior management provides assurance that the company's financial risks activities are governed by appropriate policies and risk objectives. All derivative activities for risk management purpose are carried out by teams that have appropriate skills, experience and supervision. The Board of Directors reviews and agrees policies for managing each of these risks, which are summarized below:

A. Market risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market price. Market risk comprises three types of risk interest rate risk, currency risk and other risks, such as regulatory risk and commodity price risk.

i) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The company's exposure to the risk of changes in market interest rates relates primarily to the company's borrowing obligations with floating interest rates.

Particulars	As at 31.03.2021	As at 31.03.2020
Variable rate Borrowings	33486.77	45314.11
Fixed rate Borrowings	48461.06	35620.73

Sensitivity

A reasonably possible change of 50 basis points in interest rates at the reporting date would have increased (decreased) equity and profit and loss by the amount shown below. This analysis assumes all other variables held constant.

Particulars		lecrease in Points		on Profit (Rs in Lakhs)	Impact on Equity (Rs in Lakhs)		
	2021	2020	2021	2020	2021	2020	
Increase in Basis Point	50	50	167.43	226.57	167.43	226.57	
Decrease in Basis Point	50	50	167.43	(226.57)	167.43	(226.57)	

ii) Foreign currency risk

Foreign currency risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates, the company's exposure to the risk of changes in foreign exchange rates relates primarily to the exports made by the company which are made during the year. However same is very negligible as compared to total turnover.

Sensitivity

1% increase or decrease in foreign exchange rates will have no material impact on profit.

iii) Other risk

a) Regulatory risk

Sugar industry is regulated both by central government as well as by the state government, Central and state governments policies and factors such as State Advised Price (SAP) and Fair and Remunerative Price (FRP) of sugar cane affects the sugar industry and the company's operations and profitability.

Notes on Financial Statements for the Year ended 31st March, 2021

Distillery business is also dependent on the Government policy as the price of ethanol decided by the Government. Similarly sugar prices are also effected by the Government Policies like restriction on sale, import of sugar, export of sugar and import duty / export duty determent of sugar.

The regulatory risks listed above are Government policy driven and are beyond the control of the company and can't be alleviated unless the industry is decontrolled. Various representation through the body of industry like ISMA, UPSMA and UPDA submitted to Government to come out solutions regarding above risks.

Power business is also dependent on the regulations prescribed by Central/State regulatory commissions. They fix power purchase rates and other guidelines for supply based on cost of bagasse and other inputs.

b) Commodity price risk

Sugar Prices in domestic and international markets depends primarily on the supply and demand situation. Fluctuation in demand and supply arise on account of the change in the availability and price of sugar variation in the production capacity of the competitor's availability of substitutes for the sugar products and international demand and supply position The company has mitigated this risk by adding more value added products by diversifying into co- generation and distillation, thereby utilizing the by- products. Similarly, in sugar product also the company's products are diversifying in specialty sugar segments like brown sugar, sachet, pharma sugar, icing sugar, liquid sugar etc.

B. Credit Risk

Credit risk is the risk that counter party will default on its obligations under a Contractual arrangement leading to a financial loss. The company's sugar sales are mostly on advance payment basis. Power and ethanol are sold to state government companies and petroleum companies; thereby the credit default risk is significantly mitigated. Company has also taken advances and security deposits from its customers / agents, which mitigate the credit risk to an extent Financial assets are written off when there is no reasonable expectation of recovery, however, the company continues to attempt to recover the receivables. Where recoveries are made, these are recognized in the statement of profit and loss.
